(57) Abstract: A technique is disclosed wherein information searchability and the like are excellent; relationship between a drawing, such as a substrate or circuit drawing, and the components included in the drawing can be clearly expressed; and the effort required for making an electronic service manual can be reduced. According to this technique, on a display device, a content table page is displayed in a content table page display area (a left-hand frame), while a component table page is displayed in a component table page display area (a lower right-hand frame). When a drawing item displayed in the content table page display area is selected, the substrate or circuit drawing corresponding to the selected drawing item is displayed in a drawing display area (an upper right-hand frame). When a graphic element in the substrate or circuit drawing displayed in the drawing display area is selected, the component item corresponding to the selected graphic element is displayed in the component table page display area. When a component item displayed in the component table page display area is selected, the substrate or circuit drawing including the selected component item is displayed in the drawing display area.

(57) 要約: 情報の検索性などに優れ、基板図や回路図などの図面とその図面内に含まれる部品との関連性が明確に表現でき、さらに、電子化サービスマニュアル製作の労力を軽減させる技術が開示され、その技術によれば、ディスプレイ上において、目次ページ表示領域 (左側のフレーム) 内に目次ページを表示し、部品表ページ表示領域 (右側フレームの下部) 内に部品表ページを表示する。そして、目次ページ表示領域内に表示されている図面項目が選択された場合には、選択

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
